MONSTER NOW SHIPPING AWARD-WINNING 3 PLUG OUTLETS TO GO™

*Instantly Converts a Single AC Power Outlet
Into 3 Outlets For Travelers on the Go*

Las Vegas, January 8, 2007—Monster Power, an industry leader in AC power products, is proud to announce it is now shipping 3 Plug Outlets To Go. Outlets To Go is a handy solution for those frequent travelers who need to plug in more than one electronic device when there never seems to be enough outlets.

“I travel a lot,” explained The Head Monster, Noel Lee. “But with trying to charge all my portable devices like cell phones, PDAs, and MP3 players and use my computer there never seem to be enough AC electrical outlets. The last thing I need is to drag one of those bulky multiple outlet plugs in my luggage, which is why I came up with the idea of Outlets To Go. It’s a handy little device that folds up flat so that it hardly takes up any space in my briefcase or luggage and I can turn one AC plug into three. That is more than enough to plug-in all of my electronics when traveling.”

Outlets To Go is small, light and compact and it features a Monstrous patent pending Road Warrior design. The illuminated FlatProfile™ Plug and FlatWrap™ super-flexible power cord makes for added convenience to tucks neatly into a briefcase, purse or other small spaces. The dual-side design and ultra-wide spaced outlets fit bulky AC chargers without losing outlets and minimizing space. The blue LED indicator in the plug shows the outlets are receiving power and the built in, resettable circuit breaker enhances hotel room safety by preventing dangerous overloads.

Monster Outlets To Go 3-outlet models retails for \$14.95.
